

Quality Policy

Seabed Geosolutions (SBGS) is dedicated to providing products and services of the highest possible quality while meeting the expectations of our customers and delivering exceptional value.

At SBGS we believe that every member of the Company shares the responsibility for quality and quality improvement.

Therefore:

- We will implement and communicate our quality policy within the company to ensure that all employees have a clear, comprehensive and accurate understanding of the quality standards and of their own accountabilities in achieving those quality requirements safely and responsibly;
- Managers through their communications and practices will endeavor to lead by example. They will give complete commitment and allocate the necessary resources to quality standards and programs.

Quality processes and controls will be implemented in a systematic and planned way across the Company to allow SBGS to consistently:

- Monitor, audit and review our Quality Management System (OMS) to identify areas to continually improve performance;
- Exceed our customer's expectations by ensuring appropriate two-way communications are maintained to enable us to fully understand and fulfill requirements;
- Ensure that our employees are competent to deliver products and services to the highest standards of quality;
- Ensure that employees are experienced in providing prompt and effective responses to changes in customer needs and expectations;
- Act according to and kept up-to-date on relevant quality standards, legislation and other technical guidelines;
- Set measurable targets to monitor our achievement toward pre-determined objectives;
- Evaluate our performance against these targets to identify progress;
- Provide appropriate resources and a suitable working environment;
- Reward employees for their work and initiative to advance quality of operational performance, products and services.

We are committed to operating our Company under the disciplines and controls of our Operating Management System and in accordance with the current ISO 9001 standard.

December 2014

Stephan Midenet
Chief Executive Officer
